Propulsive Landers @ Georgia Tech

Sponsorship Package

Join us in redefining student rocketry:

Every bolt, every burn, every breakthrough—made possible by student innovation and **your** support.

Our Mission

To become the first student team in the world to achieve vertical-takeoff and landing of a hybrid rocket.

Our Team

Propulsive Landers @ GT is Georgia Tech's only hybrid rocketry team, uniting over 90 students from 16 diverse academic majors. Our mission is to become the first student team in the world to achieve vertical take-off, hovering, and precision landing using a hybrid propulsion system.

Together, we blend technical innovation with cross-disciplinary collaboration to advance the future of sustainable, reusable rocketry.

Our Vision

Achieve propulsive landing while providing Georgia Tech students with valuable hands-on experience in the areas of product development, engineering, research, marketing, organizational leadership, and administration.

Collegiate Propulsive Lander Challenge

Our main competition

What is CPLC?

The **Collegiate Propulsive Lander Challenge (CPLC)** is a new competition where student teams design, build, and fly rockets capable of vertical takeoff, controlled hover, and precision landing.

As **one of the first of its kind** at the collegiate level, CPLC includes a comprehensive safety and design review, **limiting participation to only a select group of advanced student teams nationwide**. The competition outlines a series of progressive milestones and the objective is to achieve them within the shortest time frame.

Propulsive Landers is proud to be among the pioneering teams preparing for this challenge, representing Georgia Tech with the goal of becoming one of the first student teams in the world to achieve controlled propulsive landing.

Our Project Gallery

Propellant Feed System

Delivers the oxidizer to our engine.

Monoprop UAV

Validates our guidance algorithms.

1000N Hybrid Rocket Engine

Kick off engine development efforts.

2500N Hybrid Rocket Engine

Deliver thrust for full-scale flight.

Thrust Vector Control (TVC)

Redirect our thrust precisely.

Main Throttle Valve (MTV)

Throttle power to precision.

C₃H₈/N₂O Torch Igniter

Reliable ignition for every burn.

Orifice Flow Meter

Monitor oxidizer flow with accuracy.

BUILT TO FLY

From oxidizer feed dynamics to thrust vector response times, each component is engineered, tested, and iterated for reliable performance in real-time flight conditions.

Project Roadmap 2025-2026

What we can do

Our Social Media & Website

We create high-impact content through Instagram Reels and other platforms to showcase our work and drive engagement. In the past 90 days, we've reached over **140,000 views**, with over **500% growth** in our social following.

Brand Visibility Across Projects

Wherever we go, **so does your brand**. Your logo appears on our rockets, team uniforms, test setups, and across all major public events—ensuring you're seen by thousands in every phase of our journey.

Local Outreach & Banners

Whether it's corporate social responsibility or community reach, we've got you covered. We attend campus showcases, expos, and school visits—bringing your brand into classrooms, communities, and public events. Sponsor logos are proudly displayed on banners and booths throughout.

Exclusive Talents

As a sponsor, you'll receive exclusive **access to our resume book**, featuring top Georgia Tech talent with hands-on experience in propulsion, avionics, control systems, and project management—ideal for internships, co-ops, or full-time roles.

WHY IT MATTERS

Your support helps turn bold student ideas into tested, flying technology. From visibility to talent access, sponsorship with us means investing in the future of aerospace—built by students, backed by you.

Sponsorship Levels

0%

We start from the ground up: design, test, and build everything ourselves—hands-on.

100%

We give 100% credit where it's due—on every post, every stage, every payload.

Benefits	Bronze (up to \$1K USD)	Silver (Above \$1K USD)	Gold (Above \$5k USD)	Platinum (Above \$10k USD)
Sponsorship announcement Post	✓	✓	✓	✓

4 post yearly featuring company and sponsored goods				✓
Invitation to design reviews				✓
Dedicated company description on website				✓
Invitation to networking and recruiting event (Annual)				✓

How You Can Help

We benefit from:

Monetary Donation

Help us fund the tools, testing, and anything logistics needed to reach the next milestone in propulsive landing. Every dollar brings us closer to flight.

Material Donations

From valves and sensors to test hardware and fittings, in-kind contributions keep our systems moving forward and our students learning hands-on.

Your Expertise

Mentorship, feedback, and engineering insight from professionals are invaluable as we navigate design reviews, system development, and critical testing phases.

EVERY CONTRIBUTION MAKES A DIFFERENCE.

Whether it's funding, materials, or mentorship, your support directly enables our team to design, build, and test the systems that make propulsive landing a reality.
